Roadmap

1. Setting the scene
2. My study
3. Double-marking of objects
4. Double-marking of obliques

Roadmap

1. Setting the scene
2. My study
3. Double-marking of objects
4. Double-marking of obliques

Setting the scene

- **Dependent-marking (flagging, DM)** is morphological marking of participants expressed by nominals for their grammatical and/or semantic role.
- Head-marking (indexing, HM) is morphological expression on the predicate of such properties of participants as person, number and gender, as well as their grammatical and/or semantic role.

Nichols 1986, 1992, Lander & Nichols 2020, Haspelmath 2013, 2019

Cf. also Milewski 1950 and Lehmann 1983, 1985

Setting the scene

- **Dependent-marking (flagging, DM)** is morphological marking of participants expressed by nominals for their grammatical and/or semantic role.
- **Head-marking (indexing, HM)** is morphological expression on the predicate of such properties of participants as person, number and gender, as well as their grammatical and/or semantic role.

Nichols 1986, 1992, Lander & Nichols 2020, Haspelmath 2013, 2019

Cf. also Milewski 1950 and Lehmann 1983, 1985

Setting the scene

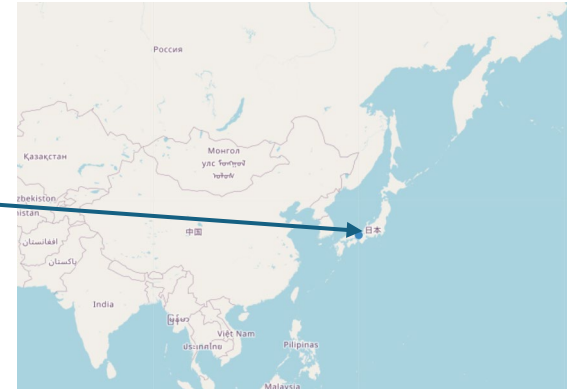

- These terms serve as typologically-grounded extensions of such notions as “case-marking” and “verbal agreement” or “cross-referencing”, respectively.
- Both are grammatical mechanisms central for the encoding of syntactic and semantic relations in many languages of the world.

Setting the scene

- Dependent-marking (flagging)

(1) **Japanese** (Altaic; constructed)

shōjo-ga *shōnen-o* *mi-ta*
girl-NOM boy-ACC see-PST
'The girl saw the boy.'

Map created with Lingtypology (Moroz 2017)

Setting the scene

- Dependent-marking (flagging)

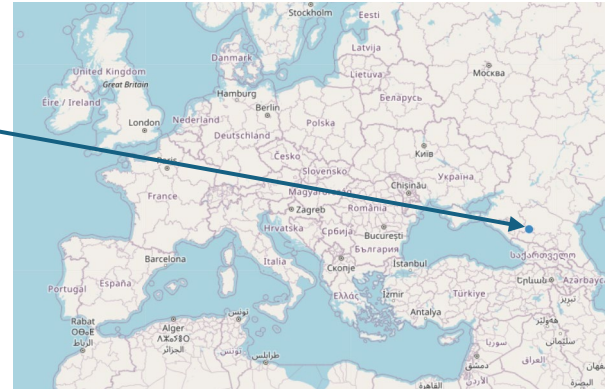

- (1) **Japanese** (Altaic; constructed)

shōjo-ga *shōnen-o* *mi-ta*
girl-NOM boy-ACC see-PST
'The girl saw the boy.'

- Head-marking (indexing)

- (2) **Abaza** (Northwest Caucasian; constructed)

a-ph^wəspa *a-č'k^wən* *də-l-ba-ṭ*
DEF-girl DEF-boy 3SG.H.ABS-3SG.F.ERG-see-DCL
'The girl saw the boy.'

Map created with Lingtypology (Moroz 2017)

ABS – absolutive, DCL – declarative, ERG – ergative, H – human

Setting the scene

- DM and HM do not exclude each other and can co-occur jointly applying to the same argument → **double-marking** or **bilocal marking** (M. Haspelmath, p.c.).

(3) Amharic (Afro-Asiatic > Semitic; Ethiopia):

lämma ṭärmus-u-n säbbär-ä-w.

Lemma bottle-DEF-ACC break:PST-3SG.M.SBJ-3SG.M.OBJ

‘Lemma broke the bottle.’ (Amberber 2005: 299)

Setting the scene

- DM and HM do not exclude each other and can co-occur jointly applying to the same argument → **double-marking** or **bilocal marking** (M. Haspelmath, p.c.).

(3) **Amharic** (Afro-Asiatic > Semitic; Ethiopia):

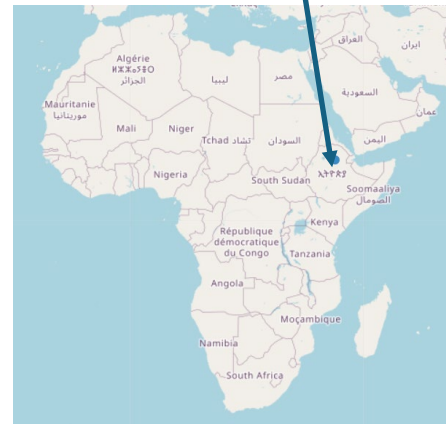

lämma *ṭärmus-u-n* *säbbär-ä-w.*

Lemma bottle-DEF-ACC break:PST-3SG.M.SBJ-3SG.M.OBJ

‘Lemma broke the bottle.’ (Amberber 2005: 299)

M – masculine, OBJ – object, SBJ - subject

Map created with Lingtypology (Moroz 2017)

Setting the scene

Object agreement
(indexing)

M – masculine, OBJ – object, SBJ - subject

Map created with Lingtypology (Moroz 2017)

Setting the scene

- Patterns of co-occurrence of HM and DM are not sufficiently studied from a cross-linguistic perspective (Vakhtin & Volodin 1986; Foster & Hofling 1987; Bakker & Siewierska 2009; Keine 2010; Baker 2013).
- In particular, the cross-linguistic distribution of double-marking across various grammatical and semantic relations remains underexplored.

Setting the scene

- Patterns of co-occurrence of HM and DM are not sufficiently studied from a cross-linguistic perspective (Vakhtin & Volodin 1986; Foster & Hofling 1987; Bakker & Siewierska 2009; Keine 2010; Baker 2013).
- In particular, the cross-linguistic distribution of double-marking across various grammatical and semantic relations remains underexplored.

Setting the scene

Amharic (Afro-Asiatic > Semitic; Ethiopia):

(4)a. *lämma ṭärmus-u-n säbbär-ä-w.*

Lemma bottle-DEF-ACC break:PST-3SG.M.SBJ-3SG.M.OBJ

‘Lemma broke the bottle.’ (Amberber 2005: 299)

b. *lä-ləḡ-u bet-u-n asayy-ä-w.*

DAT-child-DEF.M house-DEF.M-ACC showed-3SG.M.SBJ-3SG.M.OBJ

‘He showed the house to the child.’ (Leslau 1995: 893)

DEF – definite, M – masculine, OBJ – object, SBJ – subject

Setting the scene

Amharic (Afro-Asiatic > Semitic; Ethiopia):

(4)a. *lämma ṭärmus-u-n säbbär-ä-w.*

Lemma bottle-DEF-ACC break:PST-3SG.M.SBJ-3SG.M.OBJ

'Lemma broke the bottle.' (Amberber 2005: 299)

b. *lä-ləḡ-u bet-u-n*

DAT-child-DEF.M house-DEF.M-ACC show

'He showed the house to the child.'

Double-marking of the direct object (P)

DEF – definite, M – masculine, OBJ – object, SBJ – subject

Setting the scene

Amharic (Afro-Asiatic > Semitic; Ethiopia):

- (4)a. *lämma* *ṭärmus-u-n* *säbbär-ä-w*.
Lemma bottle-DEF-ACC break:PST-3SG.M.SBJ-3SG.M.OBJ
'Lemma broke the bottle.' (Amberber 2005: 299)
- b. *I-aster* *läğ-u-n* *asayy-äh^w-at*.
DAT-Aster child-DEF-ACC show-PST.1SG.SBJ-3SG.F.OBJ
'I showed Aster the child.' (Baker 2012: 259)

DEF – definite, F – feminine, M – masculine, OBJ – object, SBJ – subject

Setting the scene

Amharic (Afro-Asiatic > Semitic; Ethiopia):

Roadmap

1. Setting the scene
2. My study
3. Double-marking of objects
4. Double-marking of obliques

Roadmap

1. Setting the scene
- 2. My study**
3. Double-marking of objects
4. Double-marking of obliques

My study

- Part of a long-term typological project on the interactions between head-marking (indexing) and dependent-marking (flagging) in the languages of the world.
- Some results have already been presented and published (Arkadiev 2013, 2016, 2024a,b), but still work in progress.
- Some overlap with Bárány (2021, 2022)

My study

- Part of a long-term typological project on the interactions between head-marking (indexing) and dependent-marking (flagging) in the languages of the world.
- Some results have already been presented and published (Arkadiev 2013, 2016, 2024a,b), but still work in progress.
- Some overlap with Bárány (2021, 2022)

My study

- Project “Typology of flagging in head-marking languages” supported by a Marie-Curie senior fellowship at the Freiburg Institute for Advanced Studies (November 2023-August 2024).
- Project “Prominence hierarchies and the double-marking of objects” supported by a senior fellowship at the SFB 1252 “Prominence in Language”, University of Cologne (September-November 2024).

- Only “objects”, i.e.
 - P (patient of monotransitive predicate like ‘break’)
(6) *I broke the vase.*
 - T (theme of ditransitive predicate like ‘give’)
 - R (recipient of ditransitive predicate like ‘give’)
(7) *I gave the book **to Mary.***

Dryer 1986, Haspelmath 2005, Malchukov et al. 2010

My study

- Only “objects”, i.e.
 - P (patient of monotransitive predicate like ‘break’)
 - T (theme of ditransitive predicate like ‘give’)
 - R (recipient of ditransitive predicate like ‘give’)
 - other semantic relations (beneficiaries, locations, comitatives etc.), in particular if they receive specific encoding by flagging and/or indexing

My study

- Only the distribution of overt morphological marking:
 - overt flagging by cases or adpositions;
 - overt indexing by verbal affixes or mobile clitics
 - should be at least minimally sensitive to person, number or gender of the participant, not merely to its presence (“registration” vs. “indexing”)

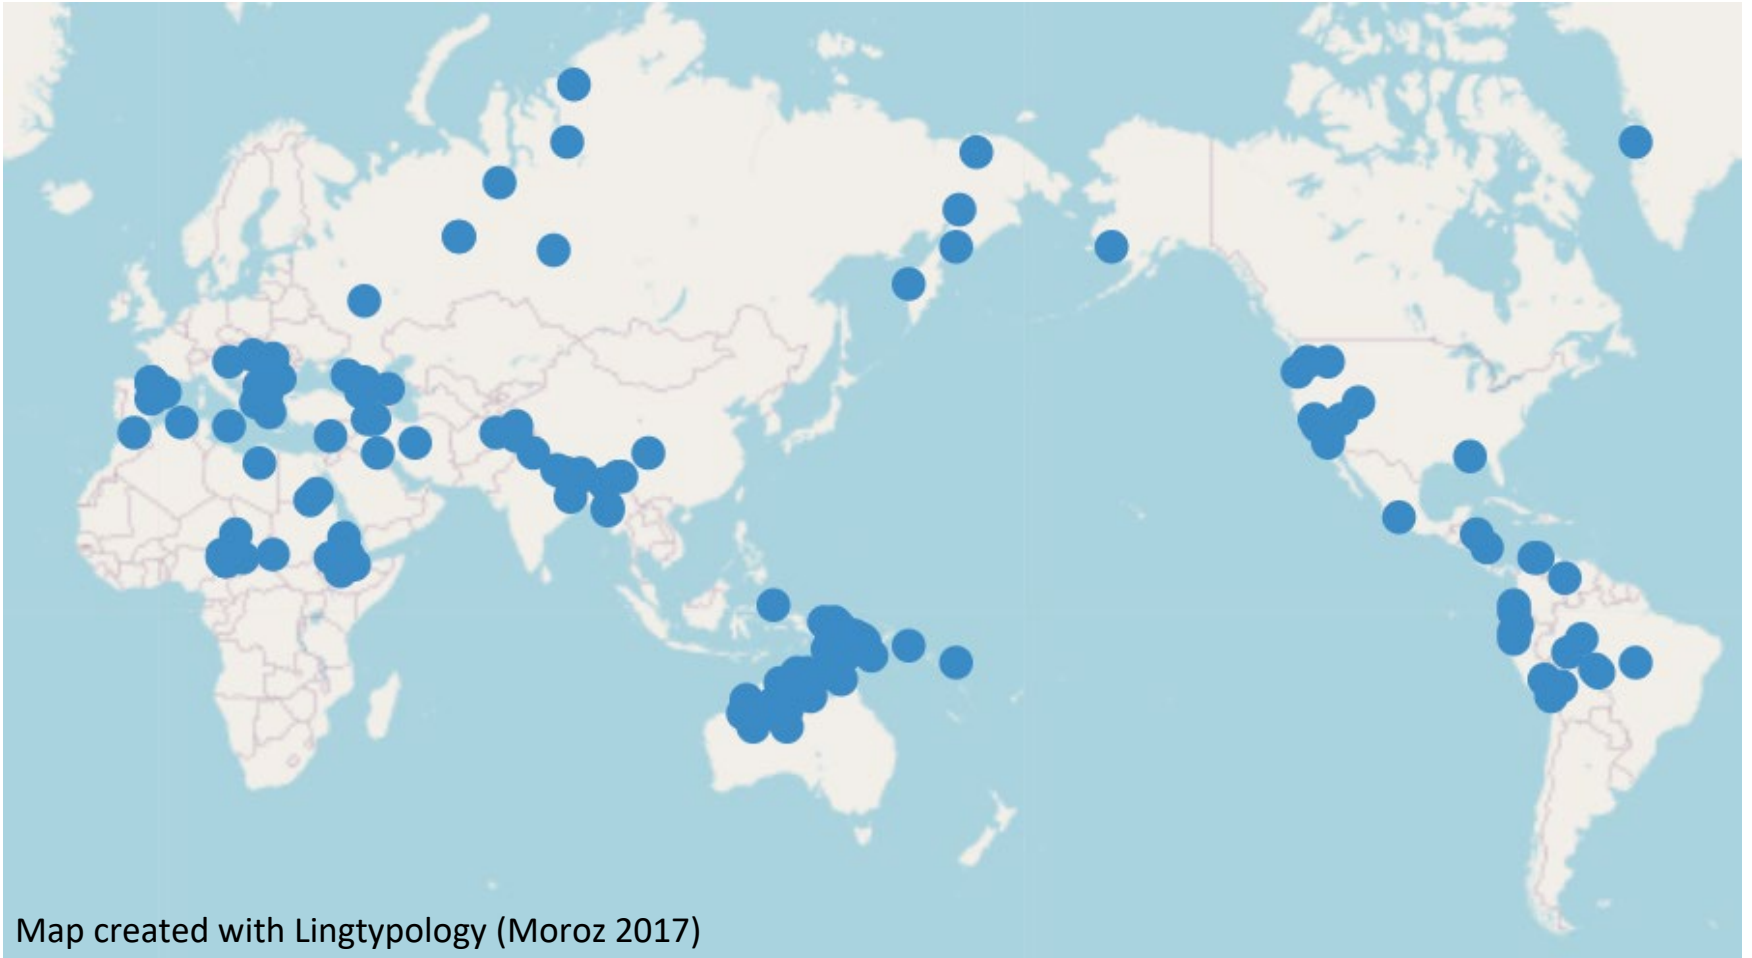

My study

- Parameters related to the so-called referential hierarchies (Silverstein 1976; Aissen 2003 etc.):
 - 1,2 person > 3 person > human > animate > inanimate
 - definite > indefinite specific > non-specific
 - primary topic > secondary topic > focus

My study

- Language sample:
 - a representative convenience sample only including languages possessing the relevant phenomena;
 - 163 languages from 66 families and 93 genera (including isolates);
 - the sample is purposefully not genealogically stratified, in order to capture family-internal variation;
 - for statistical purposes, families and genera will be counted (as many times as many types they represent).

My study

Map created with Lingtypology (Moroz 2017)

My study

Two case-studies:

- 1) Double-marking of objects of monotransitive and ditransitive predicates (P, T, R).
- 2) Double-marking of oblique objects.

Roadmap

1. Setting the scene
2. My study
3. Double-marking of objects
4. Double-marking of obliques

Roadmap

Double-marking of objects

- Double-marking of P+R
- Ezha instantiates a cross-linguistically common pattern:
 - the same nominal marker is used for flagging of R and for DOM;
 - the same verbal markers are used for indexing of R and P (under the conditions related to person/number/animacy/definiteness etc.)

Double-marking of objects

- Double-marking of P+R
- Ezha instantiates a cross-linguistically common pattern:
 - the same nominal marker is used for flagging of R and definite/animate P (differential object marking);
 - the same verbal markers are used for indexing of R and P (under the conditions related to person/number/animacy/definiteness etc.)

Double-marking of objects

- Double-marking of P+R

3SG.IO-3SG.DO=give.AOR.1SG book-ACC.SG.DEF Agim-DAT.SG

‘I did give the book to Agim.’ (Mišeska Tomić 2006: 312)

No constraint on simultaneous
flagging/indexing of both T and R

finite article, IO – indirect object index

Double-marking of objects

- Contrast Albanian with Ezha:

(13) *l-a=dhashë* *libr-in* *Agim-it.*
3SG.IO-3SG.DO=give.AOR.1SG book-ACC.SG.DEF Agim-DAT.SG
'I did give the book to Agim.' (Mišeska Tomić 2006: 312)

(14) *s'əxaj* *j-adot-əxita* *j-əridɖz-we*
Desta OBJ-mother-3SG.F OBJ-boy-DEF
dənnəg-əttf-ir-a-m
hit.PFV-3SG.F.S-BEN-3SG.F.O-DCL
'Tsehay hit the boy for the benefit of her mother.'
(Assefa 2018: 129)

Double-marking of objects

- Contrast Albanian with Ezha:

(13) *l-a=dhashë* *libr-in* *Agim-it.*
3SG.IO-3SG.DO=give.AOR.1SG book-ACC.SG.DEF Agim-DAT.SG
'I did give the book to Agim.' (Mišeska Tomić 2006: 312)

(14) *s'əxaj* *j-adot-əxita* *j-əriddz-we*
Desta OBJ-mother-3SG.F OBJ-boy-DEF
dənnəg-əttf-ir-a-m
hit.PFV-3SG.F.S-BEN-3SG.F.O-DCL
'Tsehay hit the boy for the benefit of her mother.'
(Assefa 2018: 129)

Both R and T can be flagged in
both languages

Double-marking of objects

In Albanian, both R and T can be indexed

- Contrast Albanian with Fula.

(13) *l-a=dhashë* *libr-in* *Agim-it.*
3SG.IO-3SG.DO=give.AOR.1SG book-ACC.SG.DEF Agim-DAT.SG
'I did give the book to Agim.' (Mišeska Tomić 2006: 312)

(14) *s'əxaj* *j-adot-əxita* *j-əriddz-we*
Desta OBJ-mother-3SG.F OBJ-boy-DEF
dənnəg-attf-ir-a-m
hit.PFV-3SG.F.S-BEN-3SG.F.O-DCL
'Tsehay hit the boy for the benefit of her mother.'
(Assefa 2018: 129)

Both R and T can be flagged in both languages

Double-marking of objects

In Albanian, both R and T can be indexed

- Contrast Albanian with Eza.

(13) *l-a=dhashë* *libr-in* *Agim-it.*
3SG.IO-3SG.DO=give.AOR.1SG book-ACC.SG.DEF Agim-DAT.SG
'I did give the book to Agim.' (Mišeska Tomić 2006: 312)

(14) *s'əxaj* *j-adot-əxita* *j-əriddz-we*
Desta OBJ-mother-3SG.F OBJ-boy-DEF
dənnəg-əttj-ir-a-m
hit.PFV-3SG.F.S-BEN-3SG.F.O-DCL
'Tsehay hit the boy for the benefit of her mother.'
(Assefa 2018: 129)

In Eza, only one object can be indexed, and it is the R

Both R and T can be flagged in both languages

Double-marking of objects

Double-marking of objects

Double-marking of R only

- Particularly widespread in languages with ergative-absolutive and neutral monotransitive alignments, where the P/T role is not overtly flagged.
- Otherwise only minimally different from the P+R type, since the (unflagged) P is usually also indexed.

Double-marking of objects

Double-marking of R only

- Particularly widespread in languages with ergative-absolutive and neutral monotransitive alignments, where the P/T role is not overtly flagged.
- Otherwise only minimally different from the P+R type, since the (unflagged) P is usually also indexed.

Double-marking of objects

A further type:

- Double-marking of P+T/R: either T or R can be double-marked, but not simultaneously
 - Subtype 1: T and R can both be flagged but compete for indexing (Amharic, Koryak etc.)
 - Subtype 2: T and R can both be indexed but compete for flagging (so far unattested)
 - Subtype 3: T and R both compete for indexing and flagging (Eastern Mansi, Central Alaskan Yupik)

Double-marking of objects

A further type:

- Double-marking of P+T/R: either T or R can be double-marked, but not simultaneously

| Type | Languages | Genera | Families |
|-------|-----------|--------|----------|
| P+R | 64 | 46 | 37 |
| P+R+T | 18 | 13 | 10 |
| P+R/T | 13 | 9 | 8 |
| P+T | 11 | 9 | 7 |
| R | 57 | 36 | 28 |

Double-marking of P+R is the most frequent type cross-linguistically

Double-marking of objects

- Distribution of types

| Type | Languages | Genera | Families |
|-------|-----------|--------|----------|
| P+R | 64 | 46 | 37 |
| P+R+T | 18 | 13 | 10 |
| P+R/T | 13 | 9 | 8 |
| P+T | 11 | 9 | 7 |
| R | 57 | 36 | 28 |

Double-marking of only R to the exclusion of P is the second most frequent type

Double-marking of objects

- Areal breakdown (genera)

| Area | P+R | P+R+T | P+R/T | P+T | R |
|-----------|-----|-------|-------|-----|----|
| Africa | 6 | 1 | 2 | 0 | 3 |
| Asia | 7 | 0 | 5 | 4 | 9 |
| Australia | 5 | 1 | 0 | 0 | 6 |
| Europe | 2 | 7 | 0 | 2 | 1 |
| N.America | 6 | 1 | 2 | 0 | 1 |
| S.America | 10 | 0 | 0 | 1 | 3 |
| Oceania | 12 | 3 | 0 | 2 | 13 |

Double-marking of objects

- Areal breakdown (genera)

| Area | P+R | P+R+T | P+R/T | P+T | R |
|-----------|-----|-------|-------|-----|----|
| Africa | 6 | 1 | 2 | 0 | 3 |
| Asia | 7 | 0 | 5 | 4 | 9 |
| Australia | 5 | 1 | 0 | 0 | 6 |
| Europe | 2 | 7 | 0 | 2 | 1 |
| N.America | 6 | 1 | 2 | 0 | 1 |
| S.America | 10 | 0 | 0 | 1 | 3 |
| Oceania | 12 | 3 | 0 | 2 | 13 |

P+R and R are the only two types attested
in all macro-areas

Double-marking of objects

- Areal breakdown (genera)

| Area | P+R | P+R+T | P+R/T | P+T | R |
|-----------|-----|-------|-------|-----|----|
| Africa | 6 | 1 | 2 | 0 | 3 |
| Asia | 7 | 0 | 5 | 4 | 9 |
| Australia | 5 | 1 | 0 | 0 | 6 |
| Europe | 2 | 7 | 0 | 2 | 1 |
| N.America | 0 | 1 | 2 | 0 | 1 |
| S.America | 0 | 0 | 0 | 1 | 3 |
| Oceania | 0 | 3 | 0 | 2 | 13 |

The dominant P+R type is underrepresented in Europe

Double-marking of objects

- Areal breakdown (genera)

| Area | P+R | P+R+T | P+R/T | P+T | R |
|-----------|-----|-------|-------|-----|----|
| Africa | 6 | 1 | 2 | 0 | 3 |
| Asia | 7 | 0 | 5 | 4 | 9 |
| Australia | 5 | 1 | 0 | 0 | 6 |

| S.America | 10 | 1 | 0 | 1 | 3 |
| Oceania | 12 | 1 | 0 | 2 | 13 |

The otherwise rare P+R+T type is dominant in Europe

Double-marking of objects

- Areal breakdown (genera)

| Area | P+R | P+R+T | P+R/T | P+T | R |
|-----------|-----|-------|-------|-----|----|
| Africa | 6 | 1 | 2 | 0 | 3 |
| Asia | 7 | 0 | 5 | 4 | 9 |
| Australia | 5 | 1 | 0 | 0 | 6 |
| Europe | 2 | 7 | 0 | 2 | 1 |
| N.America | 6 | 1 | 2 | 0 | 1 |
| S.America | 10 | 0 | 0 | 1 | 3 |
| Oceania | 12 | 3 | 0 | 2 | 13 |

The otherwise rare P+T and P+R/T types are overrepresented in Asia

Double-marking of objects

- Areal breakdown (genera)

| Area | P+R | P+R+T | P+R/T | P+T | R |
|-----------|-----|-------|-------|-----|----|
| Africa | 6 | 1 | 2 | 0 | 3 |
| Asia | 7 | 0 | 5 | 4 | 9 |
| Australia | 5 | 1 | 0 | 0 | 6 |
| Europe | 2 | 7 | 0 | 2 | 1 |
| N.America | 6 | 1 | 2 | 0 | 1 |
| S.America | 10 | 0 | 0 | 1 | 3 |
| Oceania | 12 | 3 | 0 | | 13 |

Double-marking of R only is particularly well-attested in Australia and Oceania

Double-marking of objects

An emergent “universal”:

(19) double-marking of P \subset double-marking of R

- Double-marking of R only is much more common than double-marking of P(+T) only (31 vs. 6 genera)
- Double-marking of R often tends to be more grammaticalized (obligatory, extended in its scope, less dependent on discourse conditions) than that of P.

Double-marking of objects

An emergent “universal”:

(19) double-marking of P \subset double-marking of R

- Double-marking of R only is much more common than double-marking of P(+T) only (36 vs. 9 genera)
- Double-marking of R often tends to be more grammaticalized (obligatory, extended in its scope, less dependent on discourse conditions) than that of P.

Double-marking of objects

An emergent “universal”:

(19) double-marking of P \subset double-marking of R

- Double-marking of R only is much more common than double-marking of P(+T) only (36 vs. 9 genera)
- Double-marking of R often tends to be more grammaticalized (obligatory, extended in its scope, less dependent on discourse conditions) than that of P.

Double-marking of objects

Puma (Sino-Tibetan > Himalayish, Nepal; Sharma 2014: 191-3)

- (20) a. *ŋa-a khim khaŋ-u-ŋ*
1SG-ERG house see-3.O-1SG.A
'I see a/the house.'
- b. *ŋa-a khipa khaŋ-u-ŋ*

1SG-ERG dog-OBJ see-3.O-1SG.A
'I see the dog.'
- d. *ŋa-a pʌsupʌti iskul-lai kʌphekwa itd-u-ŋ*
1SG-ERG PN school-OBJ money give-3.O-1SG.A
'I gave money to the Pashupati School.'

P: differential double-marking restricted to definite animates

R: consistent obligatory double-marking

Double-marking of objects

| | | flagging | | indexing | |
|----------|---------------------|-----------|--------|-----------|--------|
| | | languages | genera | languages | genera |
| P | no | 47 | 29 | 5 | 5 |
| | differential | 86 | 56 | 90 | 56 |
| | consistent | 28 | 21 | 68 | 42 |
| R | no | 0 | 0 | 9 | 7 |
| | differential | 37 | 32 | 69 | 45 |
| | consistent | 126 | 74 | 85 | 55 |

Double-marking of objects

| | | flagging | | indexing | |
|---|--------------|-----------|--------|-----------|--------|
| | | languages | genera | languages | genera |
| P | no | 47 | 29 | 5 | 5 |
| | differential | 86 | 56 | 90 | 56 |
| | consistent | 28 | 21 | 68 | 42 |
| R | no | 0 | 0 | 9 | 7 |
| | differential | 37 | 32 | 69 | 45 |
| | consistent | 126 | 74 | 85 | 55 |

A mirror-image distribution of differential vs. consistent marking of P vs. R in both flagging and indexing

Double-marking of objects

| | | flagging | | indexing | |
|---|--------------|-----------|--------|-----------|--------|
| | | languages | genera | languages | genera |
| P | no | 47 | 29 | 5 | 5 |
| | differential | 86 | 56 | 90 | 56 |
| | consistent | 28 | 21 | 68 | 42 |
| R | no | 0 | 0 | 9 | 7 |
| | differential | 37 | 32 | 69 | 45 |
| | consistent | 126 | 74 | 85 | 55 |

However, the difference between P and R is significant only for flagging (Fisher's exact test, $p \ll 0,0001$), but not for indexing ($p = 0,09$)

Double-marking of objects

| | | double-marking | |
|----------|---------------------|----------------|--------|
| | | languages | genera |
| P | no | 57 | 36 |
| | differential | 97 | 62 |
| | consistent | 9 | 7 |
| R | no | 11 | 9 |
| | differential | 93 | 63 |
| | consistent | 59 | 39 |

Double-marking of objects

| | | double-marking | |
|---|--------------|----------------|--------|
| | | languages | genera |
| P | no | 57 | 36 |
| | differential | 97 | 62 |
| | consistent | 9 | 7 |
| R | no | 11 | 9 |
| | differential | 93 | 63 |
| | consistent | 59 | 39 |

Consistent double-marking is attested significantly more frequently with R than with P (Fisher's exact test, $p \ll 0,001$), even though P and R show no difference wrt differential double-marking

Double-marking of objects

A fairly straightforward diachronic explanation for (19):

- R is usually higher on prominence hierarchies than P and especially T (e.g. Kittilä 2006);
- hence more frequently encoded by means of pronouns, which in turn have greater chances to become obligatory indexes (e.g. Givón 1976: 160–166; Siewierska 2003: 356).
- R is a more specific and less frequent semantic role than P, hence it has greater chances of being overtly marked (e.g. Dryer 1986: 841; Haspelmath 2005: 7, 11).

Double-marking of objects

A fairly straightforward diachronic explanation for (19):

Double-marking of objects

- Double-marking of objects:
 - is well-attested cross-linguistically;
 - is diachronically and functionally motivated;
 - its cross-linguistic variation is constrained by an interplay of factors related to both semantic roles and referential prominence;
 - while some patterns appear to be cross-linguistic defaults, some of the less frequently attested patterns show clear areal and/or genealogical profiles.

Double-marking of objects

- Double-marking of objects:

Double-marking of objects

- Some open questions:

- Why do Uralic languages stand out against the global trend?
- To what extent do flagging and indexing align or are independent of each other?
- Given the higher degree of redundancy of double-marking patterns, how are they used in natural discourse?

Double-marking of objects

- Some open questions:

- Indexing is (unsurprisingly) believed to be restricted to core grammatical relations.
- Nichols (1986: 78): a hierarchy of construction types favouring head-marking:
 - most likely
 - least likely
 - governed > subcategorized > inner adverbials > outer adverbials
- Still, indexing of obliquely-marked participants is attested.

Double-marking of obliques

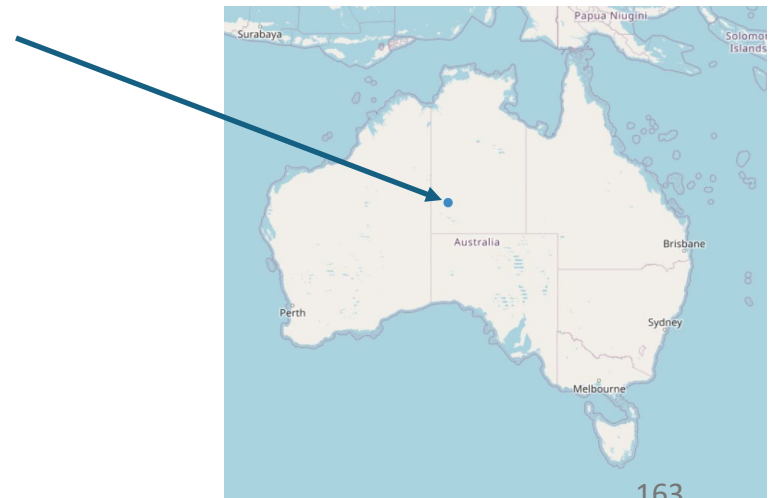

Pintupi (Pama-Nyungan > Desert Nyungic; Hansen & Hansen 1978: 61)

(5) *ma_laku=latju-tjanampalura* *pitjangu*
return=1PL.EX.SBJ-3PL.AV went

ma_lpu-ngkamarra *patjal-tjakumarra*
spirit-AV biting-AV

‘We turned back to avoid the spirits biting us.’

AV – avoidance, EX – exclusive

Double-marking of obliques

- Indexing of non-subject (S/A) participants flagged differently from objects (P, T, R).
 - NB Should be distinguished from cases where a peripheral participant is promoted to core status (e.g. by an applicative) and hence indexed and flagged in the same way as P (or, more rarely, R).
- Various semantic roles: bene/maleficiary, comitative, instrument, purpose, location etc.
- The same referential hierarchies as for objects.

Double-marking of obliques

- Indexing of non-subject (S/A) participants flagged differently from objects (P, T, R).
 - NB Should be distinguished from cases where a peripheral participant is promoted to core status (e.g. by an applicative) and hence indexed and flagged in the same way as P (or, more rarely, R).
- Various semantic roles: bene/maleficiary, comitative, instrument, purpose, location etc.
- The same referential hierarchies as for objects.

Double-marking of obliques

- Indexing of non-subject (S/A) participants flagged differently from objects (P, T, R).
 - NB Should be distinguished from cases where a peripheral participant is promoted to core status (e.g. by an applicative) and hence indexed and flagged in the same way as P (or, more rarely, R).
- Various semantic roles: bene/maleficiary, comitative, instrument, purpose, location etc.
- The same referential hierarchies as for objects.

Double-marking of obliques

- Indexing of non-subject (S/A) participants flagged differently from objects (P, T, R).
 - NB Should be distinguished from cases where a peripheral participant is promoted to core status (e.g. by an applicative) and hence indexed and flagged in the same way as P (or, more rarely, R).
- Various semantic roles: bene/maleficiary, comitative, instrument, purpose, location etc.
- The same referential hierarchies as for objects.

Double-marking of obliques

- 34 languages of the sample (21 genera, 18 families)
- Attested in all macroareas, with a particularly high concentration in Australia and New Guinea

Double-marking of obliques

| area | yes | | no | |
|-----------|-----------|--------|-----------|--------|
| | languages | genera | languages | genera |
| Africa | 3 | 1 | 15 | 8 |
| Asia | 3 | 3 | 36 | 13 |
| Australia | 14 | 7 | 6 | 7 |
| Europe | 3 | 3 | 14 | 9 |
| N.America | 1 | 1 | 14 | 8 |
| S.America | 2 | 2 | 14 | 12 |
| Oceania | 8 | 6 | 29 | 24 |

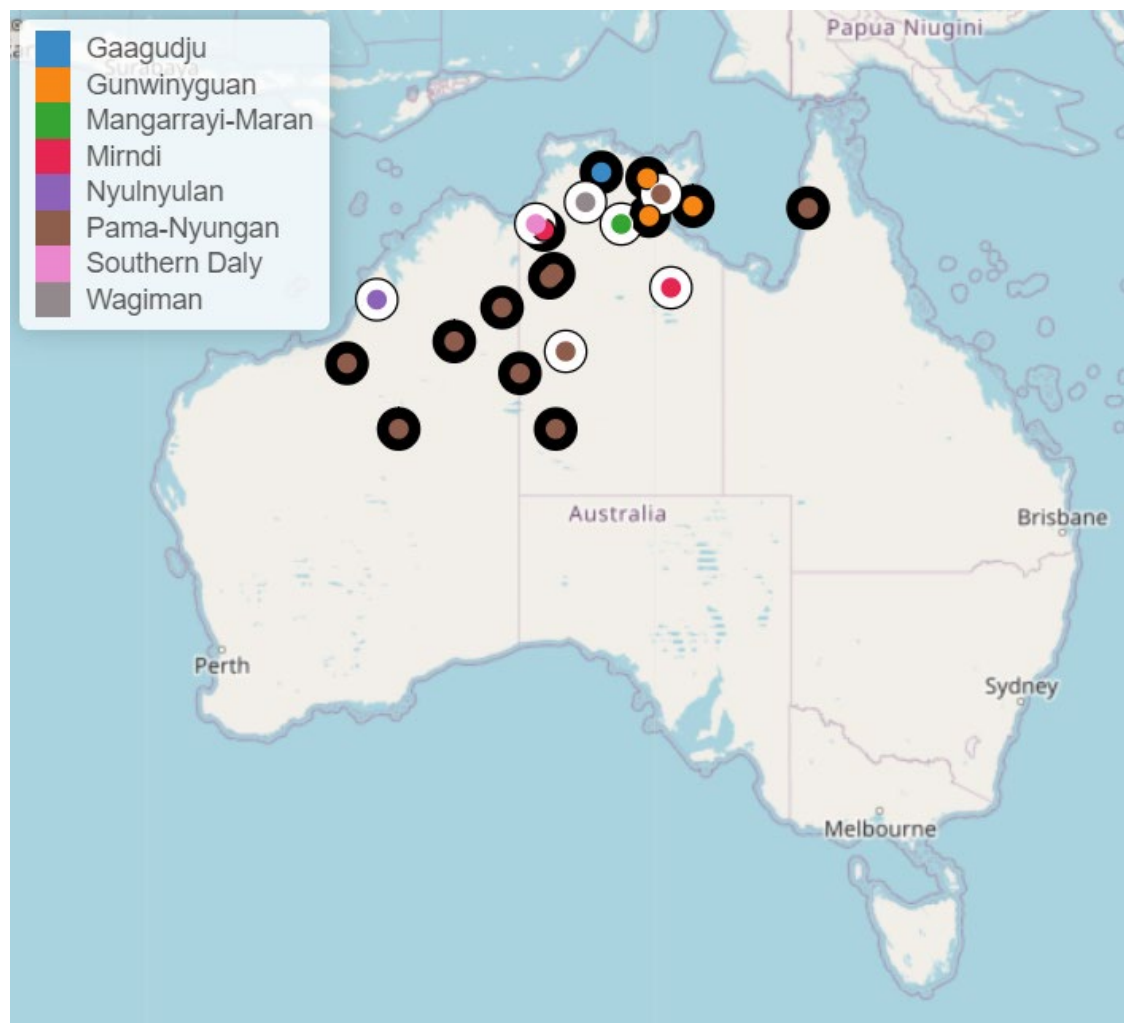

Double-marking of obliques

A clear areal feature transcending the borders of language families

Double-marking of obliques

A clear areal feature transcending the borders of language families

Particularly well-attested in the Pama-Nyungan languages of the North(-West), cf. Ennever & Browne 2023

Double-marking of obliques

Fore (Trans-New-Guinean > Kainantu-Gorokan, Papua New Guinea; Scott 1978: 112): **beneficiary**

- (22) *na-ba:-ném-pá'-ti* *a-'ta-y-e*
1SG-father-1SG-SG-ALLAT 3SG.O-put-3SG.S-IND
'He puts it there **for my father.**'

ALLAT – allative,
IND – indicative

Double-marking of obliques

Panará (Macro-Je > Je, Brasil; Bardagil-Mas 2018: 155): **comitative**

(23) *ka ka=ti=ra=kõõ=a=kwy tepi suu inkjẽ kõõ*
2SG IRR=NSPK=1SG=COM=ADRE=go fish PUPR 1SG COM
'You'll go fishing **with me**.'

ADRE – addressee, COM – comitative, IRR – irrealis, NSPK – non-speaker,
PURP – purposive

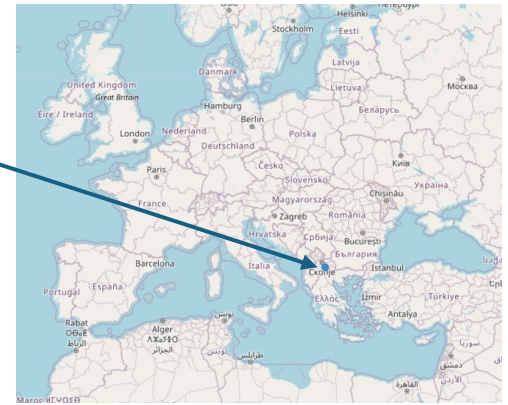

Double-marking of obliques

Amharic (Afro-Asiatic > Semitic, Ethiopia; Leslau 1995: 430):
instrument

(24) *almaz b-addisu ərsasə-wa şaf-äčč-əbb-ät*
Almaz INS-new pencil-3SG.F write.PFV-3SG.F.S-INS-3SG.O
'Almaz wrote with her new pencil.'

INS – instrumental case / instrumental applicative, PFV – perfective

Double-marking of obliques

Macedonian (Indo-European > Slavic; dialectal, Lunt 1952: 108): **location**

(25) *Naizlego-a* *gluvc-i* *i* *mu=pojdo-a*
come.out-AOR.3PL.S rat-PL and 3SG.M.IO=go-AOR.3PL.S

kaj adži mačor-ot...

to Haji cat-DEF

‘The rats came out in crowds and went **to Haji Cat...**’

AOR – aorist

Double-marking of obliques

Further parameter of variation (cf. Ennever & Browne 2023 on Pama-Nyungan):

- Are obliques indexed in the same way as R, or by a separate sets of indexes?
 - Not always straightforward to determine.
- Potentially points to distinct historical pathways.

Double-marking of obliques

Further parameter of variation (cf. Ennever & Browne 2023 on Pama-Nyungan):

- Are obliques indexed in the same way as R, or by a separate sets of indexes?
 - Not always straightforward to determine.
- Potentially points to distinct historical pathways.

Double-marking of obliques

Further parameter of variation (cf. Ennever & Browne 2023 on Pama-Nyungan):

- Are obliques indexed in the same way as R, or by a separate sets of indexes?
 - Not always straightforward to determine.
- Potentially points to distinct historical pathways.

Double-marking of obliques

- Indexing of obliques vs. R

Double-marking of obliques

- Role of prominence hierarchies

Tabasaran (Nakh-Daghestanian > Lezgetic; Russia, Bogomolova 2018): only 1st and 2nd persons, and only if “the non-subject participant ... makes a significant contribution to the situation”

(26) a. *rasul uzu-x-na* *ka-f-nu(=zu-x-na)*
Rasul 1SG-APUD-LAT PFV-come-PST(=1SG-APUD-LAT)
‘Rasul came to me.’ (Bogomolova 2018: 826)

b. *žarv* *χazʲajin.ži-x-na*
run[IMP] landlord-APUD-LAT
‘Run to the landlord!’ (Bogomolova 2012: 116)

Double-marking of obliques

locutor object:
flagging: yes
indexing: optional

- Role of prominence hierarchies

Tabasaran (Nakh-Daghestanian > Lezgetic; Russia, Bogomolova 2018): only 1st and 2nd persons, and only if “the non-subject participant ... makes a significant contribution to the situation”

(26) a. *rasul uzu-x-na* *ka-f-nu(=zu-x-na)*
Rasul 1SG-APUD-LAT PFV-come-PST(=1SG-APUD-LAT)
‘Rasul came to me.’ (Bogomolova 2018: 826)

b. *žarv* *χazʹajin.ži-x-na*
run[IMP] landlord-APUD-LAT
‘Run to the landlord!’ (Bogomolova 2012: 116)

APUD – “apud” localisation; LAT – lative

Double-marking of obliques

3rd person object:
flagging: yes
indexing: no

- Role of prominence hierarchies

Tabasaran (Nakh-Daghestanian > Lezgetic; Russia, Bogomolova 2018): only 1st and 2nd persons, and only if “the non-subject participant ... makes a significant contribution to the situation”

- (26) a. *rasul uzu-x-na* *ba-f-nu(=zu-x-na)*
Rasul 1SG-APUD-LAT PFV-come-PST(=1SG-APUD-LAT)
‘Rasul came to me.’ (Bogomolova 2018: 826)
- b. *žarv* *χazʲajin.ži-x-na*
run[IMP] landlord-APUD-LAT
‘Run to the landlord!’ (Bogomolova 2012: 116)

APUD – “apud” localisation; LAT – lative

Double-marking of obliques

- Role of prominence hierarchies

In the Australian languages, indexing of oblique participants is almost invariably restricted to animate or human referents (Ennever & Browne 2023: 6).

Double-marking of obliques

- Role of prominence hierarchies

Nyangumarta (Pama-Nyungan > Desert Nyungic;
Sharp 2004: 333): animacy

- (27) a. *Partany karnti-nyi mungka-nga.*
child climb-NFUT tree-LOC
'The child climbed the tree.'
- b. *Karnti-nyi-li yawarta-nga.*
climb-NFUT-3SG.LOC horse-LOC
'He climbed onto the horse.'

Double-marking of obliques

inanimate object:
flagging: yes
indexing: no

- Role of prominence hierarchies

Nyangumarta (Pama-Nyungan > Desert Nyungic;
Sharp 2004: 333): animacy

(27) a. *Partany karnti-nyi mungka-nga.*
child climb-NFUT tree-LOC
'The child climbed the tree.'

b. *Karnti-nyi-li yawarta-nga.*
climb-NFUT-3SG.LOC horse-LOC
'He climbed onto the horse.'

LOC – locative case, NFUT – non-future

Double-marking of obliques

animate object:
flagging: yes
indexing: yes

- Role of prominence hierarchies

Nyangumarta (Pama-Nyungan > Desert Nyungic;
Sharp 2004: 333): animacy

- (27) a. *Partany karnti-nyi mungka-nga.*
child climb-NFUT tree-LOC
'The child climbed the tree.'
- b. *Karnti-nyi-li yawarta-nga.*
climb-NFUT-3SG.OBL horse-LOC
'He climbed onto the horse.'

LOC – locative case, NFUT – non-future,
OBL – oblique index set

Double-marking of obliques

- Role of prominence hierarchies

Manambu (Ndu, Papua New Guinea; Aikhenvald 2008: 62):
topicality

(28) *wun a-də yab-a:r yi-tua-d*
1SG DIST-SG.M road-ALLAT go-1SG.S-3SG.M.B
'I went towards this road (that we are talking about).'

ALLAT – allative, B – basic index set,
DIST – distal demonstrative,
M – masculine, S – subject index set

Double-marking of obliques

- Role of prominence hierarchies

Manambu (Ndu, Papua New Guinea; Aikhenvald 2008: 62):
topicality

(28) *wun a-də yab-a:r yi-tua-d*
1SG DIST-SG.M road-ALLAT go-1SG.S-3SG.M.B
'I went towards this road (that we are talking about).'

ALLAT – allative, B – basic index set,
DIST – distal demonstrative,
M – masculine, S – subject index set

Double-marking of obliques

- Tentative diachronic pathways:
 - extension of P/R-markers to obliques (Macedonian, some Papuan, Molalla);
 - doubling with pronouns in oblique cases (Tabasaran, Pama-Nyungan);
 - incorporation of postpositions with indexes > applicatives (Ethiosemitic, Sumerian, Panara)

Double-marking of obliques

- Tentative diachronic pathways:
 - extension of P/R-markers to obliques (Macedonian, some Papuan, Molalla);
 - doubling with pronouns in oblique cases (Tabasaran, Pama-Nyungan);
 - incorporation of postpositions with indexes > applicatives (Ethiosemitic, Sumerian, Panara)

Double-marking of obliques

- Tentative diachronic pathways:

 - doubling with pronouns in oblique cases (Tabasaran, Pama-Nyungan);
 - incorporation of postpositions with indexes > applicatives (Ethiosemitic, Sumerian, Panara)

Double-marking of obliques

- Tentative diachronic pathways:
 - extension of P/R-markers to obliques (Macedonian, some Papuan, Molalla);
 - doubling with pronouns in oblique cases (Tabasaran, Pama-Nyungan);
 - incorporation of postpositions with indexes > applicatives (Ethiosemitic, Sumerian, Panara)

Double-marking of obliques

- Extension of P/R-markers to obliques

Nama (Yam > Nambu, Papua New Guinea; Siegel 2023)

(29) a. *ghakr-am mères yè-frango-t-e*
boy-ERG girl 3SG.ABS-leave-IPFV-2|3SG.A
'The boy is leaving the girl.' (p. 30)

b. *yèmo náifè y-a-ram Mawai-e*
3SG.ERG knife 3SG.ABS-APP-give:INC.3SG.A Mawai-DAT
'He just gave Mawai the knife.' (p. 57)

c. *ágha-f-e-t ne*
dog-PL-DAT-ALLAT gut
'I threw the guts to

ABS – absolutive, APP – applicative, C – case

Double-marking of obliques

Absolutive indexes: P
(no flagging)

- Extension of P/R-markers to obliques

Nama (Yam > Nambu, Papua New Guinea; Siegel 2023)

(29) a. *ghakr-am mèrès yè-frango-t-e*
boy-ERG girl 3SG.ABS-leave-IPFV-2|3SG.A
'The boy is leaving the girl.' (p. 30)

b. *yèmo náifè y-a-ram Mawai-e*
3SG.ERG knife 3SG.ABS-APP-give:INC.3SG.A Mawai-DAT
'He just gave Mawai the knife.' (p. 57)

c. *ágha-f-e-t ne e-wa-tárnan*
dog-PL-DAT-ALLAT guts 3NSG.ABS-APP-throw:CUR.1SG.A
'I threw the guts to/for the dogs.' (p. 75)

ABS – absolutive, APP – applicative, CUR – current tense, IPFV - imperfective

Double-marking of obliques

Absolutive indexes: R
(dative flagging)

- Extension of P/R-markers to obliques

Nama (Yam > Nambu, Papua New Guinea; Siegel 2023)

- (29) a. *ghakr-am mèrès yè-frango-t-e*
boy-ERG girl 3SG.ABS-leave-IPFV-2|3SG.A
'The boy is leaving the girl.' (p. 30)
- b. *yèmo náifè y-a-ram Mawai-e*
3SG.ERG knife 3SG.ABS-APP-give:INC.3SG.A Mawai-DAT
'He just gave Mawai the knife.' (p. 57)
- c. *ágha-f-e-t ne e-wa-tárnan*
dog-PL-DAT-ALLAT guts 3NSG.ABS-APP-throw:CUR.1SG.A
'I threw the guts to/for the dogs.' (p. 75)

ABS – absolutive, APP – applicative, CUR – current tense, IPFV - imperfective

Double-marking of obliques

Absolutive indexes: Ben
(dative-allative flagging)

- Extension of P/R-markers to obliques

Nama (Yam > Nambu, Papua New Guinea; Siegel 2023)

- (29) a. *ghakr-am mères yè-frango-t-e*
boy-ERG girl 3SG.ABS-leave-IPFV-2|3SG.A
'The boy is leaving **the girl.**' (p. 30)
- b. *yèmo náifè y-a-ram Mawai-e*
3SG.ERG knife 3SG.ABS-APP-give:INC.3SG.A Mawai-DAT
'He just gave **Mawai** the knife.' (p. 57)
- c. *ágha-f-e-t ne e-wa-tárnan*
dog-PL-DAT-ALLAT guts 3NSG.ABS-APP-throw:CUR.1SG.A
'I threw the guts **to/for the dogs.**' (p. 75)

ABS – absolutive, APP – applicative, CUR – current tense, IPFV - imperfective

Double-marking of obliques

- All Yam languages index overtly flagged recipients and beneficiaries by the Absolutive prefixes.
- However, only in a few closely-related languages of the Nambu subgroup and only marginally (e.g. in Nama only in the plural), are beneficiaries flagged differently from recipients.

Double-marking of obliques

- All Yam languages index overtly flagged recipients and beneficiaries by the Absolutive prefixes.
- However, only in a few closely-related languages of the Nambu subgroup and only marginally (e.g. in Nama only in the plural), are beneficiaries flagged differently from recipients.

Double-marking of obliques

- Doubling of discourse-prominent obliques with pronouns in oblique cases

Tabasaran (Nakh-Daghestanian > Lezgetic; Russia) presents a clear case of a relatively recent development of this type (Harris 1994; Bogomolova 2012, 2018):

- person agreement only with 1st and 2nd person arguments;
- obligatory for S/A, optional for other participants;
- agreement suffixes/enclitics are clearly related to various case forms of independent pronouns.

Double-marking of obliques

- Doubling of discourse-prominent obliques with pronouns in oblique cases

Tabasaran (Nakh-Daghestanian > Lezgetic; Russia) presents a clear case of a relatively recent development of this type (Harris 1994; Bogomolova 2012, 2018):

- person agreement only with 1st and 2nd person arguments;
- obligatory for S/A, optional for other participants;
- agreement suffixes/enclitics are clearly related to various case forms of independent pronouns.

Double-marking of obliques

- Doubling of discourse-prominent obliques with pronouns in oblique cases

Tabasaran (Nakh-Daghestanian > Lezgetic; Russia) presents a clear case of a relatively recent development of this type (Harris 1994; Bogomolova 2012, 2018):

- person agreement only with 1st and 2nd person arguments;
- obligatory for S/A, optional for other participants;
- agreement suffixes/enclitics are clearly related to various case forms of independent pronouns.

Double-marking of obliques

- Doubling of discourse-prominent obliques with pronouns in oblique cases

Tabasaran (Nakh-Daghestanian > Lezgetic; Russia) presents a clear case of a relatively recent development of this type (Harris 1994; Bogomolova 2012, 2018):

- person agreement only with 1st and 2nd person arguments;
- obligatory for S/A, optional for other participants;
- agreement suffixes/enclitics are transparently related to various case forms of independent pronouns.

Double-marking of obliques

Tabasaran (Nakh-Daghestanian > Lezgetic; Russia, Bogomolova 2018: 825): partial paradigm of free pronouns and person indexes

| case | free 2Sg | verbal index 2Sg |
|--------------|-----------------|------------------|
| dative | <i>uvu-z</i> | <i>=vu-z</i> |
| apud(essive) | <i>uvu-x</i> | <i>=vu-x</i> |
| post(essive) | <i>uvu-q</i> | <i>=vu-q</i> |
| super(ess) | <i>uvu-ʔin</i> | <i>=vu-ʔin</i> |
| apudlative | <i>uvu-x-na</i> | <i>=vu-x-na</i> |

Double-marking of obliques

- The pronominal doubling scenario is also applicable for some Australian languages (cf. Dixon 2004: 379-93; Mushin & Simpson 2008), however, in many languages free and bound pronouns are formally quite divergent.

Double-marking of obliques

- Incorporation of adpositions with indexes as “applicative complexes” (Ethiosemitic, Sumerian, Panara).
- In fact is difficult (if at all possible) to distinguish from pronominal doubling.

Double-marking of obliques

- Incorporation of adpositions with indexes as “applicative complexes” (Ethiosemitic, Sumerian, Panara).
- In fact is difficult (and sometimes hardly possible) to distinguish from pronominal doubling.

Double-marking of obliques

Panará (Macro-Je > Je, Brasil; Bardagil-Mas 2018: 155):

(23) *ka ka=ti=ra=kõõ=a=kwy tepi suu inkjẽ kõõ*
2SG IRR=NSPK=1SG=COM=ADRE=go fish PUPR 1SG COM
'You'll go fishing with me.'

ADRE – addressee, COM – comitative, IRR – irrealis, NSPK – non-speaker,
PURP – purposive

Double-marking of obliques

Panará (Macro-Je > Je, Brasil; Bardagil-Mas 2018: 155):

(23) *ka ka=ti=ra=kõõ=a=kwy tepi suu inkjẽ kõõ*
2SG IRR=NSPK=1SG=COM=ADRE=go fish PUPR 1SG COM
'You'll go fishing with me.'

The stem of the free pronoun has nothing in common with the verbal pronominal index

ADRE – addressee, COM – comitative, IRR – irrealis, NSPK – non-speaker, PURP – purposive

Double-marking of obliques

Panará (Macro-Je > Je, Brasil; Bardagil-Mas 2018: 155):

(23) *ka ka=ti=ra=kõõ=a=kwy tepi suu inkjẽ kõõ*
2SG IRR=NSPK=1SG=COM=ADRE=go fish PUPR 1SG COM
'You'll go fishing with me.'

The set of verbal indexes appearing before incorporated postpositions is identical to the S/P indexes

ADRE – addressee, COM – comitative, IRR – irrealis, NSPK – non-speaker, PURP – purposive

Double-marking of obliques

- Indexing of obliquely-marked participants is an infrequent phenomenon, but it is attested in a number of language families all over the world.
- Like other types of indexing, tends to be systematically related to prominence hierarchies.
- Can arguably arise through several recurrent diachronic pathways.
- Clearly deserves a more comprehensive investigation.

Double-marking of obliques

Double-marking of objects

- Why are some logically possible options not attested?
- Haspelmath 2005, Malchukov et al. 2010; cf. Bárány 2021
 - P is aligned either with T or with R, hence “P+T” or “P+R” are attested, while “P” alone is unlikely
 - T is rarely indexed, but if it is, then P is also indexed; if T is both indexed and flagged, then in the same way as P, hence “T” alone is unlikely;
 - T and R seem to never be treated in the same way unless P is aligned with them, hence “T+R” alone is unlikely.

Double-marking of objects

Double-marking of objects cross-linguistically

- Double-marking of P+T/R

Eastern Mansi (Uralic, Virtanen 2012: 125-126):

- (17) a. *söät lont wöänt-øtääm poolyøm-wooj-ø/ tøxt-iitø*
seven goose flock-ACC.3SG frozen-fat-INS feed-3SG>SG
'He feeds his flock of seven geese with frozen fat.'
- b. *ton kuuly-tööt-pöäl-mø eek°ø wisy-kom-nø*
that smock-sleeve-half-ACC woman young-man-LAT
kuuly-tågl-ii junt-ø/s-tø
smock-full-TRNSL sew-PST-3SG>SG
'The woman resewed the one sleeve of the smock into a full smock for her son.'

Double-marking of objects cross-linguistically

topical R:
flagging: like P
indexing: like P

- Double-marking of P+T/R

Eastern Mansi (Uralic, Virtanen 2012: 125-126):

(16) a. *söät lont wöänt-øtääm poolyøm-wooj-ø/ tøxt-iitø*
seven goose flock-ACC.3SG frozen-fat-INS feed-3SG>SG
'He feeds his flock of seven geese with frozen fat.'

b. *ton kuuly-tööt-pöäl-mø eek°ø wisy-kom-nø*
that smock-sleeve-half-ACC woman young-man-LAT
kuuly-tågl-ii junt-ø-s-tø
smock-full-TRNSL sew-PST-3SG>SG
'The woman resewed the one sleeve of the smock into a
full smock for her son.'

Double-marking of objects cross-linguistically

topical T:
flagging: like P
indexing: like P

- Double-marking of P+T/R

Eastern Mansi (Uralic, Virtanen 2012: 125-126):

- (16) a. *söät lont wöänt-øtääm poolyøm-wooj-øl tøxt-iitø*
seven goose flock-ACC.3SG frozen-fat-INS feed-3SG>SG
'He feeds his flock of seven geese with frozen fat.'
- b. *ton kuuly-tõõt-pöäl-mø eek°ø wisy-kom-nø*
that smock-sleeve-half-ACC woman young-man-LAT
kuuly-tågl-ii junt-øš-tø
smock-full-TRNSL sew-PST-3SG>SG
'The woman resewed the one sleeve of the smock into a full smock for her son.'

Double-marking of objects cross-linguistically

Either T or R, but not both, are aligned with P in terms of both flagging and indexing, depending on topicality

- Double-marking of P+T/R

Eastern Mansi (Uralic, Virtanen 2012: 125-126):

(16) a. *söät lont wöänt-øtääm poolyøm-wooj-øl tøxt-iitø*
seven goose flock-ACC.3SG frozen-fat-INS feed-3SG>SG

‘He feeds his flock of seven geese with frozen fat.’

b. *ton kuuly-tõõt-pöäl-mø eek°ø wisy-kom-nø*
that smock-sleeve-half-ACC woman young-man-LAT

kuuly-tågl-ii junt-øš-tø
smock-full-TRNSL sew-PST-3SG>SG

‘The woman re sewed the one sleeve of the smock into a full smock for her son.’

Double-marking of objects

- Patterns of same vs. different flagging resc. indexing show correlations with double-marking types:
- flagging (genera)

| | same | different | both |
|-------|------|-----------|------|
| P+R | 32 | 9 | 8 |
| P+R+T | 4 | 6 | 6 |
| P+R/T | 4 | 2 | 6 |
| P+T | 1 | 8 | 0 |
| R | 4 | 27 | 6 |
